Professional Summary

Computer Science graduate specializing in Artificial Intelligence and Machine Learning, with strong knowledge of Python, SQL, Web Technologies, and Deep Learning. Skilled in Python programming, problem-solving, database management, and developing efficient software solutions. Seeking an entry-level opportunity as a Python Developer or Software Developer where I can apply my technical skills, contribute to organizational growth, and continuously enhance my expertise.

Education

- **Sree Dattha Institutions of Engineering and Science Hyderbad** *2022-Present*
  Bachelor of Technology in Computer Science Engineering (Artificial Intelligence and Machine Learning) CGPA/Percentage: 6.89
- **Sri Aakash junior college** *2020-2022*
  Board of Intermediate, Telangana CGPA/Percentage: 7.0
- **Webees High School** *2020*
  Board of Secondary Education, Telangana CGPA/Percentage: 10.0

Personal Projects

- **Deep Fake Audio Detection Using Deep learning**
  This project Focuses on Detecting Deep fake audio using Deeplearning techniques.
  - Tools & technologies used: Python, CNN, LSTM, MFCC, Kaggle Dataset.
  - Developed a deep learning–based system to detect fake and real audio signals. Used MFCC features to extract important audio characteristics from speech data. Implemented a hybrid CNN–LSTM model to capture both spatial and temporal patterns in audio. Trained and tested the model using a deep fake audio dataset with an 80:20 split. Built a web interface that allows users to upload audio files and get real-time detection results.

- **Emotion Based Music Recommendation System**
  Developed a personalized music recommendation system that suggests songs based on the user's current emotional state.
  - Tools & technologies used: Python, OpenCV, MediaPipe, TensorFlow, Keras, NumPy, Streamlit, Computer Vision.
  - Developed a real-time emotion-based music recommendation system using webcam input and facial/hand landmark analysis with MediaPipe Holistic. Trained a deep learning model using TensorFlow and Keras on normalized landmark features for accurate emotion classification and deployed the solution as a Streamlit web application with real-time emotion display and automated YouTube-based music recommendations

Technical Skills and Interests

Programming: Python

Programming Concepts: Object-Oriented Programming(OOP)

Web Technology : HTML,CSS,JavaScript

Databases: MySQL,DBMS,SQL

Soft Skills: Analytical Thinking,Problem-Solving,Team Collaboration,Adaptability

Field of intrest: Software Engineering, Python Application Development, Database Management and Web Application Development

Achievements

- **Great Learning:** Introduction Artificial Intelligence certificate by Great Learning.
- **INTERNSHIPS :** Machine Learning with Python from jyesta Corparate Entity ,Banglore
- **Deloitte:**Certified on Data Analytics
